Thank you for your gift.

AWS Foundation

The eye of an eagle
The heart of a lion
The hands of a woman

Attributes of the Ideal Surgeon 15th Century
Our purpose as the AWS Foundation is to provide opportunities for the educational and professional growth of women in surgery. As surgeons, we are familiar with the barriers many women face; therefore, we wish to provide a means for heightening the visibility of women surgeons and creating advancement opportunities for them by funding initiatives to promote educational and professional growth.

While more and more women are entering medical school, they still need support and encouragement to become the surgeons our patients need. Our programs reach out to girls and women, encouraging them as surgeons and supporting them throughout their professional lives. AWS helps women in all stages of surgical training and career development by offering mentoring services, career development guidance and grant monies to start an academic career.

The gratitude of our patients and their families, and the satisfaction we receive from making a difference in our patients’ lives, are often our most lasting reward.

Please consider saying “Thank You” to your surgeon in a meaningful way through your contribution to the AWS Foundation in her name.
